

MAXXIMUM PERFORMANCE™ LUBRICANTS

SYNTHETIC MULTIVEHICLE AUTOMATIC TRANSMISSION FLUID DEXRON® VI

Maximum Performance™ Synthetic ATF Multivehicle Dexron® VI is a full synthetic, low viscosity automatic transmission fluid specially designed to meet the stringent requirements of General Motors automatic transmissions as well as most major brands of automatic transmissions. Maximum Performance™ Synthetic ATF Multivehicle Dexron® VI is engineered from the highest quality synthetic base stocks as well as premier additive technology. Maximum Performance Synthetic ATF Multivehicle Dexron® VI offers excellent oxidation stability, outstanding low temperature performance, exceptional antiwear protection, superior resistance to sludge and deposit formation, long service life and enhanced frictional properties for smooth shift performance. This fluid is approved by General Motors under license number J-60183.

Performance Features

- Full Synthetic Formulation
- Exceptional Oxidation and Thermal Stability
- Long Service Life
- Outstanding Antiwear Protection
- Superior Resistance to Sludge and Deposit Formation
- Low Temperature Performance
- Friction Modified - Smooth Performance
- Superior Foam Resistance
